

The Very Large Table

BY WME0

VLT SERIES

SPECIFICATIONS

→ PYROLAVE

Lava stone is forged in the heat of a volcano. Thousands of years ago lava flowed into valleys of the Auvergne region in France. Over time it slowly petrified into stone and has been used for buildings and monuments since Roman Times.

The lava stone for VLT tabletops is mined by Pyrolave. Sustainably extracted in strictly limited quantities. Natural boulders are lifted away, then sliced into large slabs – using diamond-tipped saws and CNC water jet technology. They're hand-sanded until smooth before each piece is fired for eight hours at 1,000°C. This process is intense and only the strongest slabs survive to the next stage. Which is being hand painted with enamel and fired twice more. Creating slabs strong enough for anything, with glazes brought to life - delicately crackled surface, natural colour variations and deep hues.

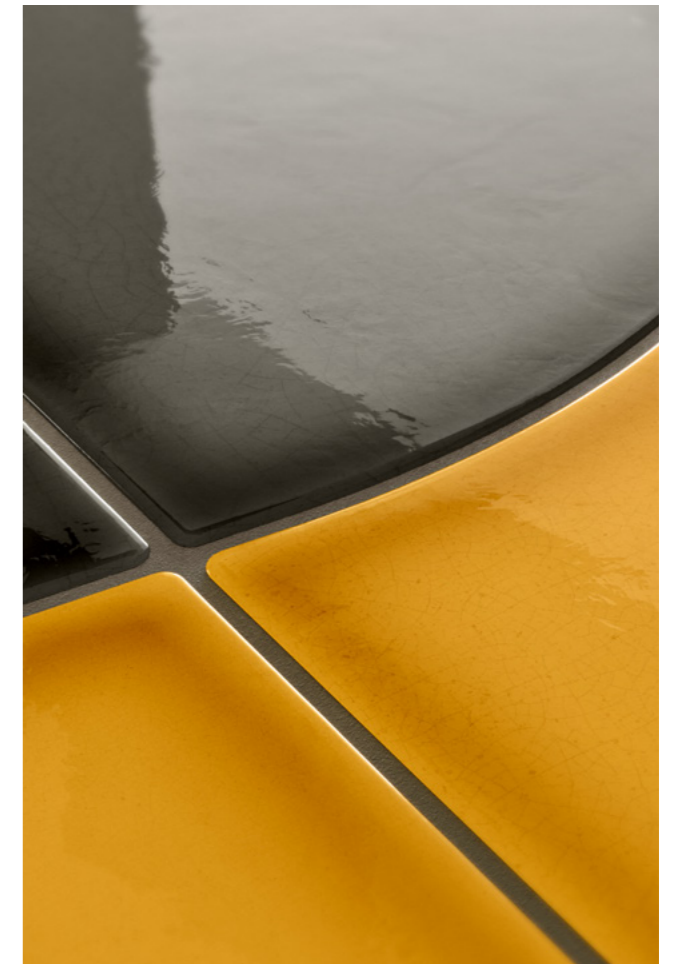

→ MADE TO ORDER

Every VLT is made to order. You can choose one of our designs and customise in up to 60 shades of enamel (plus grout in many colours). Or you can ask us to design something fully bespoke. Every VLT can be made up to 4.5 metres long – a size which can comfortably seat 18 people.

VLT frames are handcrafted in the UK in a choice of cast bronze, forged steel or aluminium.

Every component is made by hand, assembled and finished by master craftsmen, imbuing each table a subtle tactile quality. Let your hand run along the edge of the table and you'll see what we mean.

We've used Aerospace technology (a space-age-y mesh layer), which enables us to spread the weight of the lava stone top and create The VLT's gravity-defying span. Once complete, The VLT is assembled like a giant's jigsaw. Each hefty piece is lifted and lowered, very carefully, into the frame. Then it's ready to host. Indoors or outside. Come rain or shine.

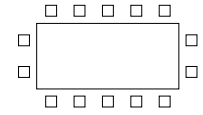

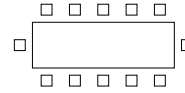

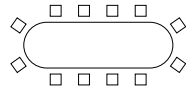

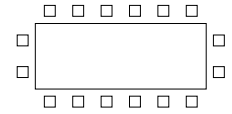

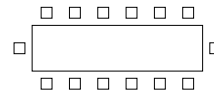

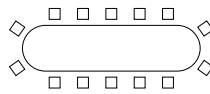

→ FRAMES

Each VLT is fully bespoke and we can make it any size you require. L seats up to 12 people, XL around 14, and XXL as many as 16. Choose between long and lean, oval-ended or you can go wide.

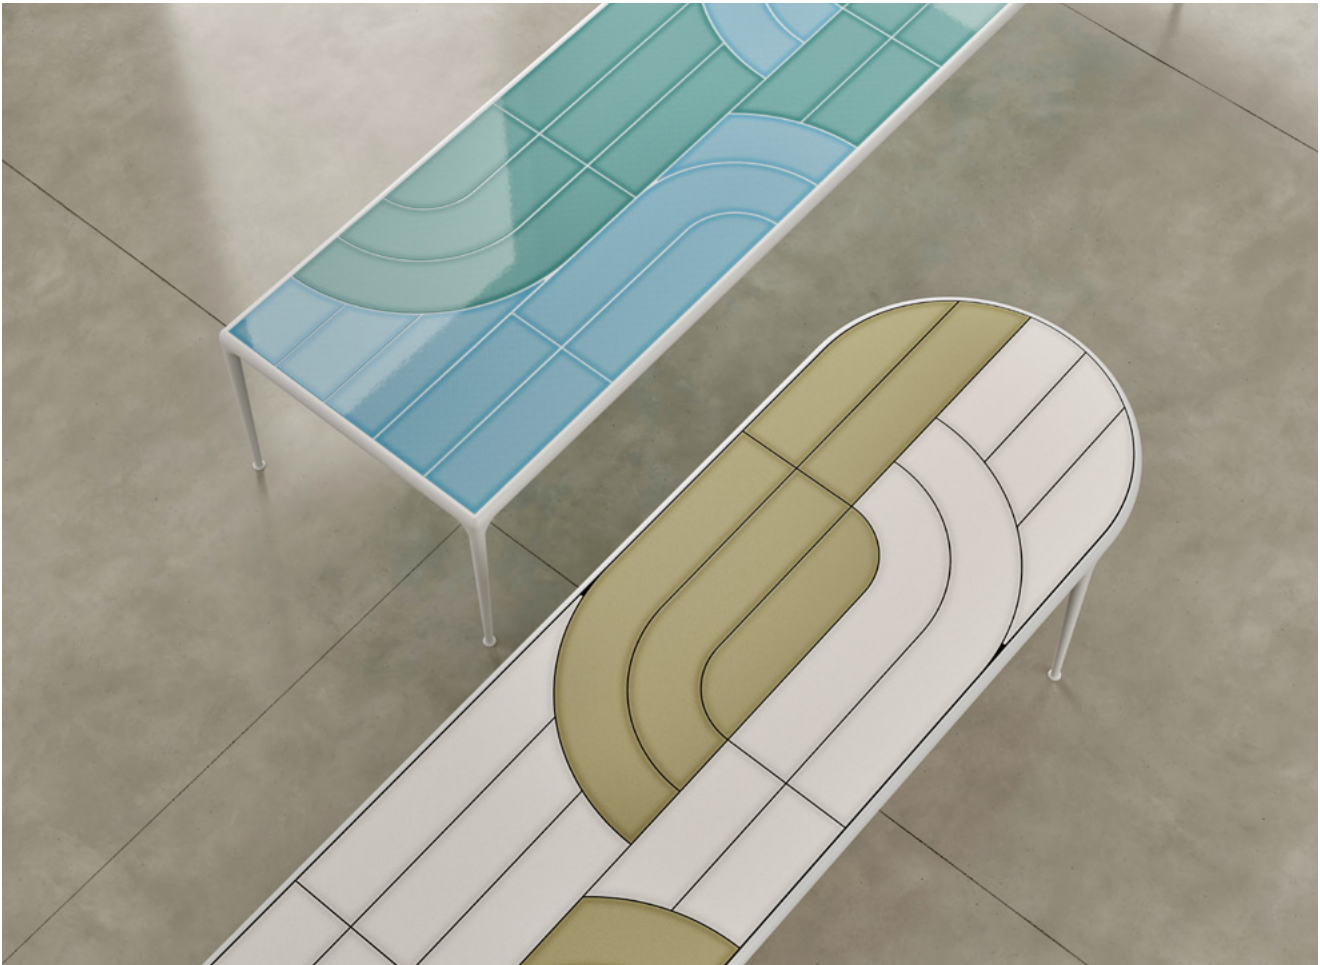

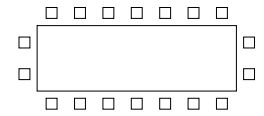

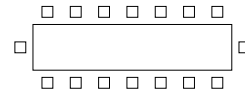

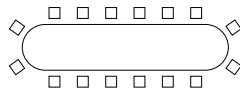

L → Seats 12-14
From 320cm (11ft)

XL → Seats 14-16
From 390cm (13ft)

XXL → Seats 16-18
From 460cm (15ft)

→ FRAMES

Our frames are cast in aluminium or bronze.
Each frame is assembled by hand and the end result is one seamless, sculptural piece.

→ PYROLAVE

Choose from our full range of Lavastone shades.
Or let us create your very own.

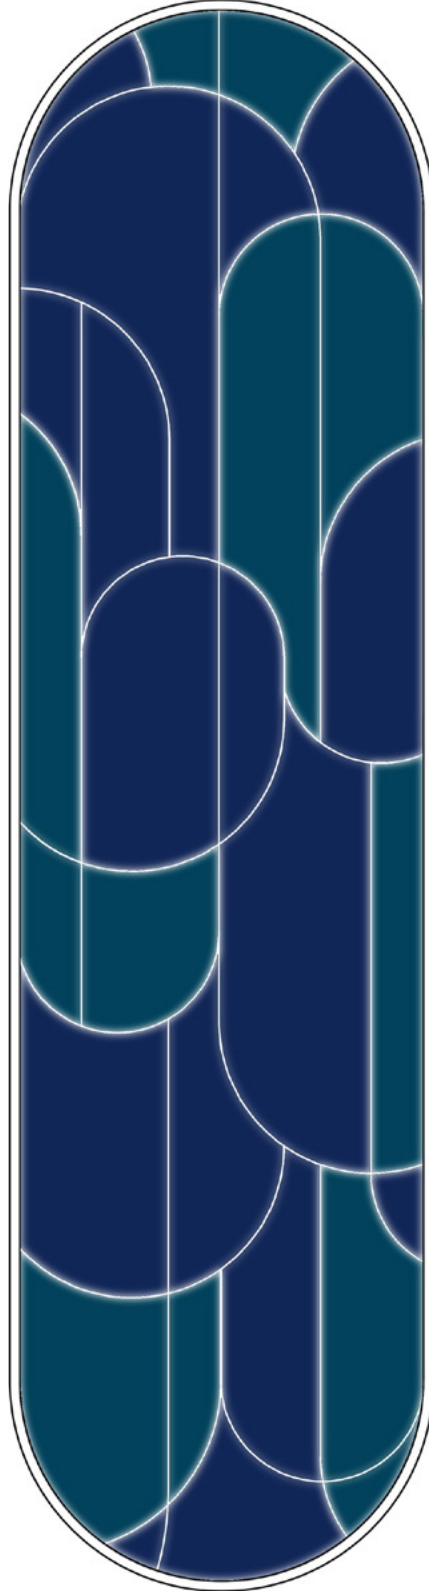

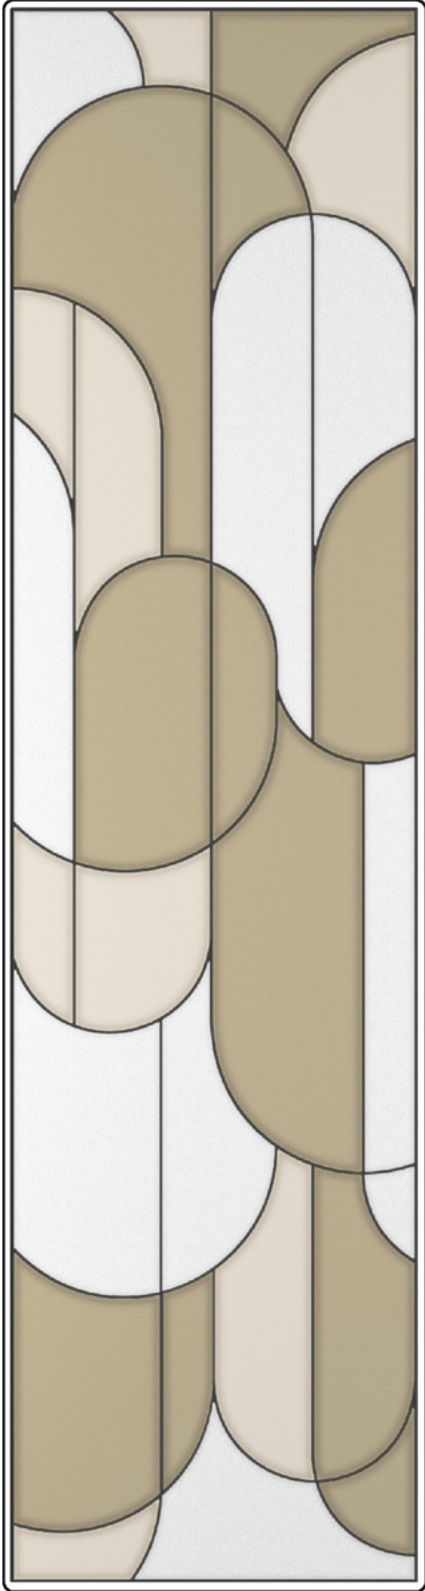

60 standard shades

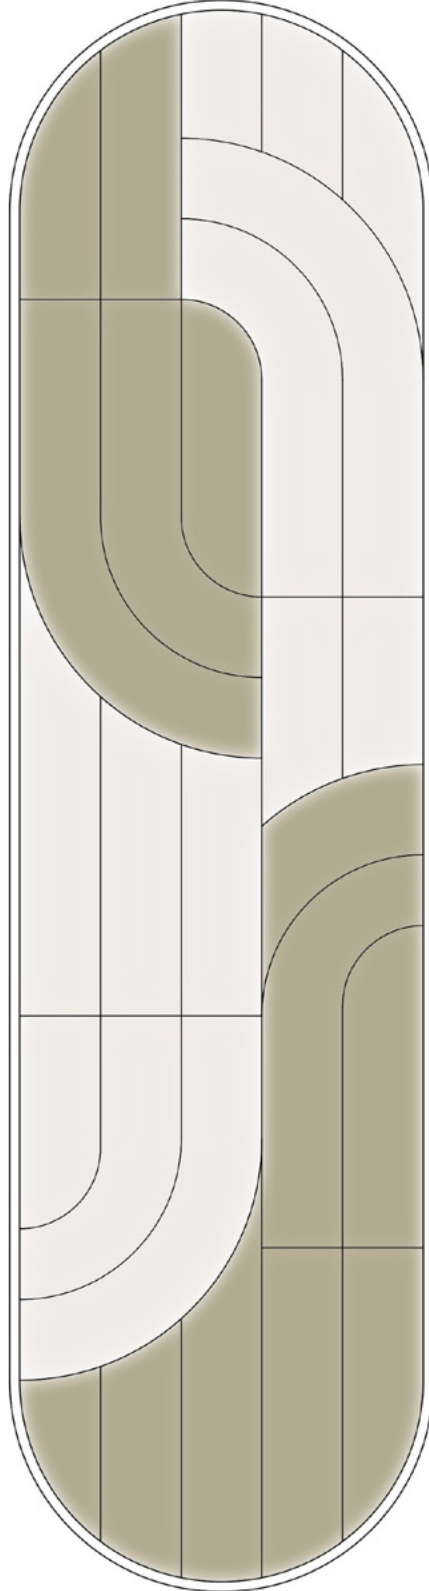

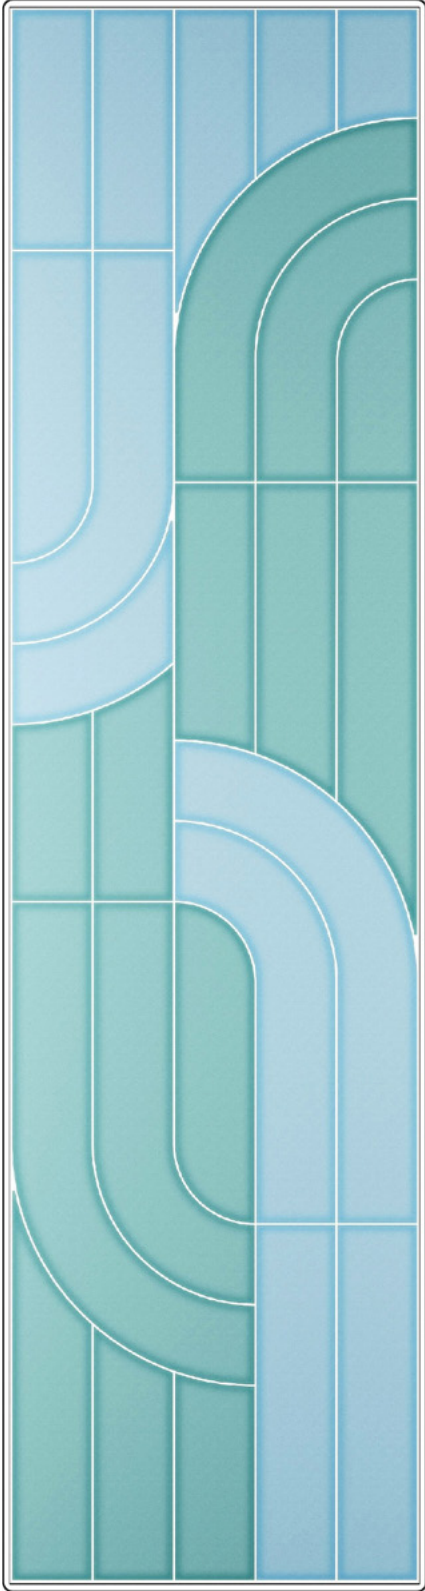

→ ANTIBES

Designed to gaze over the Med, round the clock,
all year round.

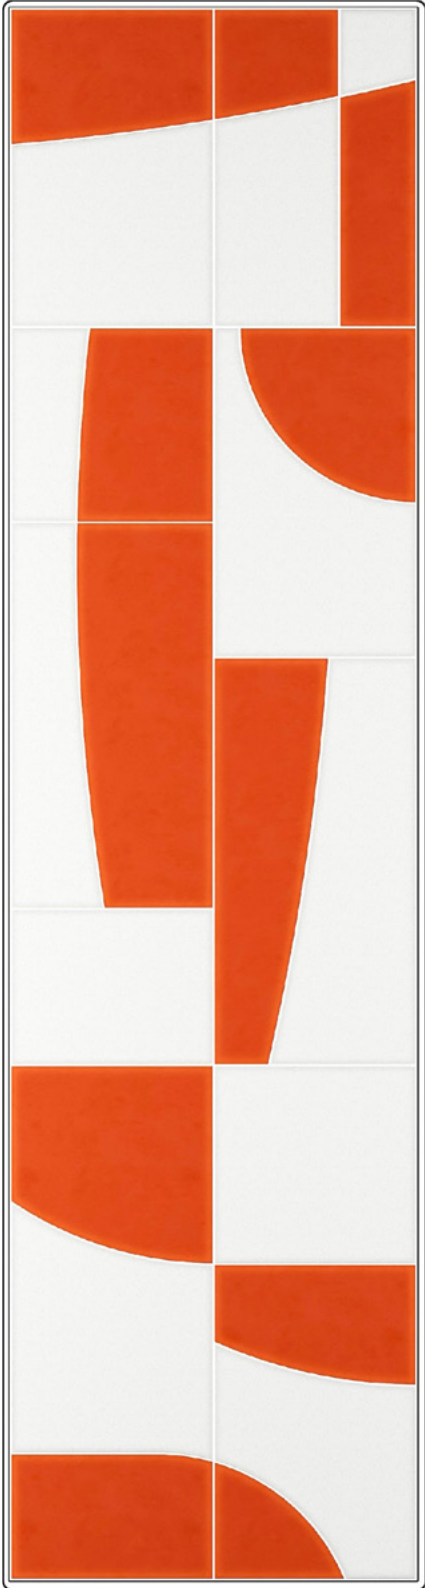

→ MIAMI

Art Deco, ocean life, and music. And dancing.
That's where this is coming from.

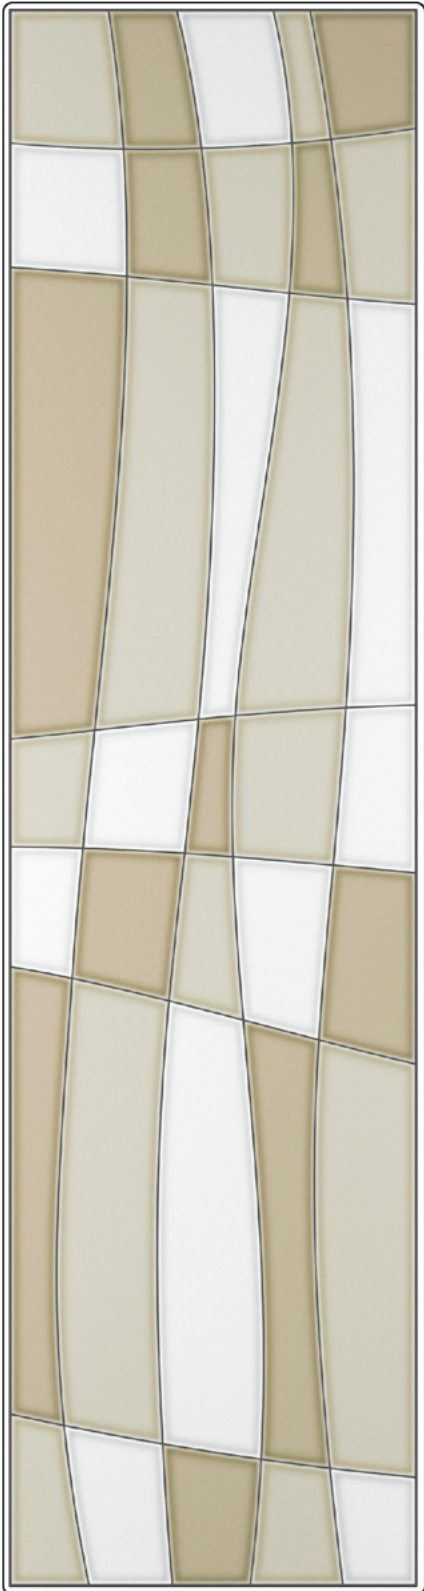

→ DUBROVNIK

Angular limestone walls contrast with the deep blue waves of the Adriatic.

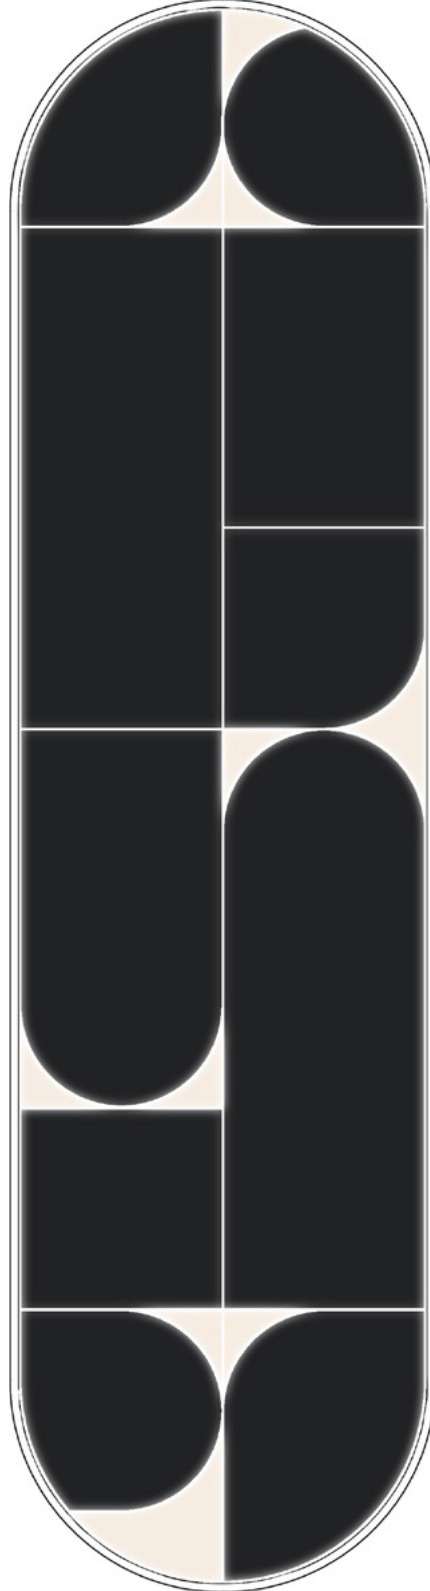

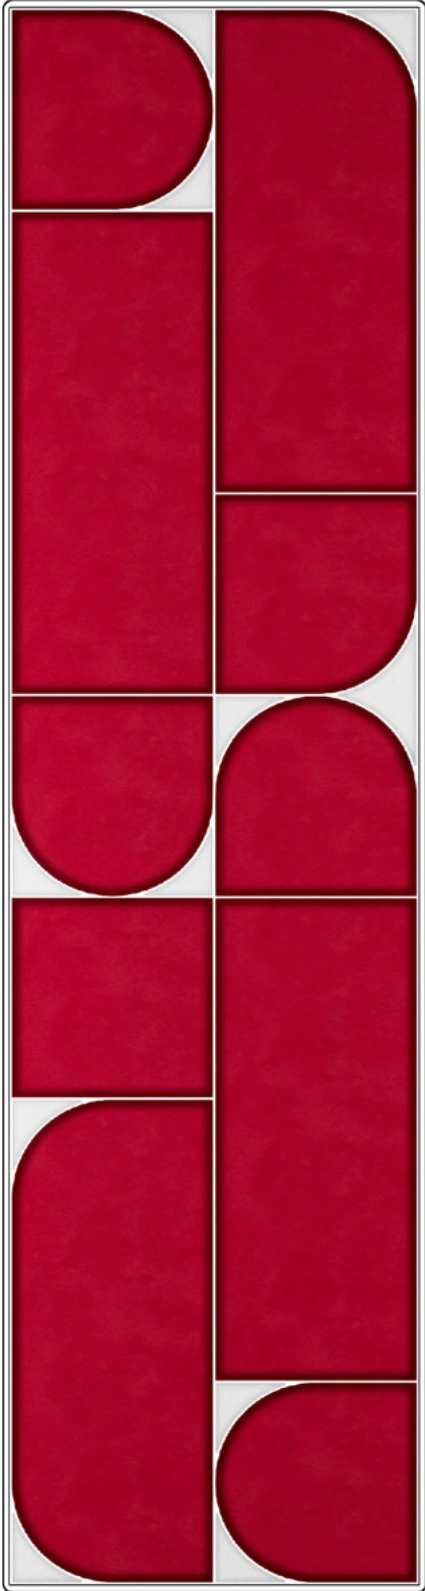

→ ST TROPEZ

So many blues plus sunlight throws shade
in St Tropez. Natural home of The VLT.

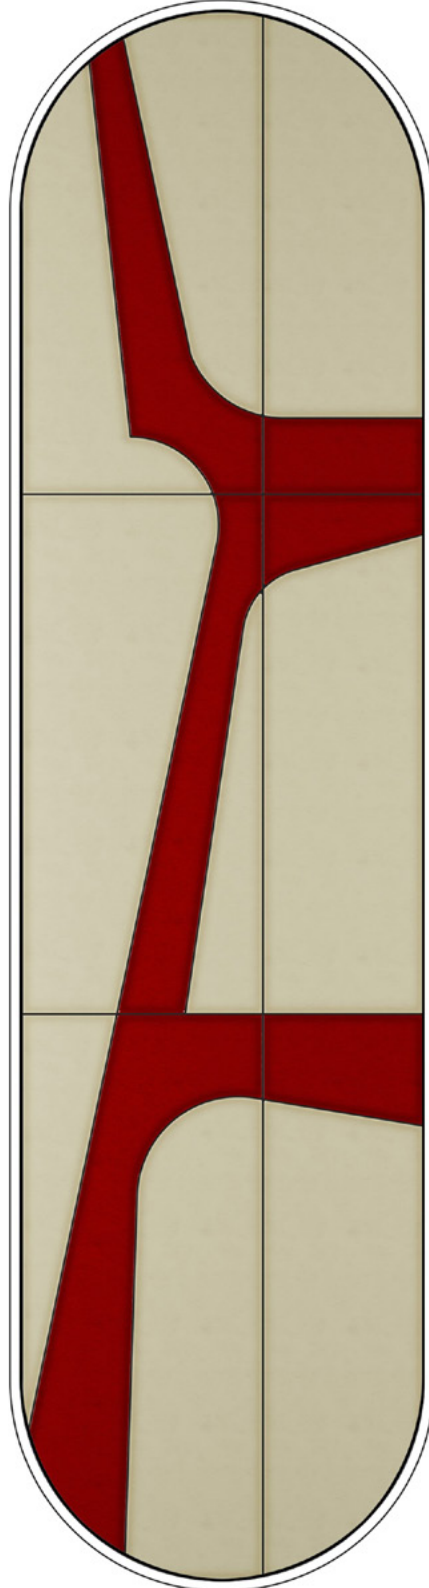

→ COLOMBIER

Rocky island like walking on the moon,
so it's strong, futuristic and a little bit abstract.

→ ST IVES

Modernism loves St Ives, so this is abstract and the pattern transforms with colour.
